AMENDMENTS TO THE ABSTRACT

In the Abstract:

AMENDMENTS TO THE DRAWINGS

In the Drawings:

AMENDMENTS TO THE SPECIFICATION

Page 6, line 33, through page 7, line 9, please substitute the following:

Similarly, in the example of FIG. 2B, in 172 a faked RRLP request to the MS 106 originates in the BSC 114 or SMLC [[174]] 118 after perform location request 156. This allows the MS 106 to continue the MO request 140 with a connection management (CM) service request 160 from the MS 106 to the BSC/SMLC [[174]] 114/118 without placing the MS 106 on hold and so, without delaying the MO service request. Likewise in 162 the BSC/SMLC [[174]] 114/118 forwards the MO request to the MSC 116 to establish the MO transaction in 164. Subsequently or coincidentally, in 166 the response to the MT-LR begins when the LCS specific message is provided to the BSC/SMLC [[174]] 114/118. In 168 the MSC 116 forwards the positional information to the GMLC 120. Finally, in 170 the GMLC 120 forwards the MT-LR response to the LCS client 122.
